THE WORLD OVER

ALBERTA TO BE NIGHT PAPER

WHEAT SUFFERS IN THE STATES

EVIDENCES OF TRADE UPTURN

GOLD TAX MODIFIED; REMAINS

On and after May 16 the Calgary Alberta will be published as an evening paper. With the issue of May 16 publication of the paper the morning editions will cease. This step has been necessitated by the desire to provide a paper for the evening news to evening newspapers. Both readers and advertisers in the very large majority, prefer the evening journal to the morning one.

DES MOINES—Mother Nature continued her program of involuntary crop reduction on Monday under a flaming sun. Farmers bewailed the lack of moisture as they saw their hayfields and pastures scorch under the sun. Throughout the region from Ohio to Colorado reported record-breaking temperatures and an almost universal dearth of rain.

Small grains continued to suffer most from the heat and dryness. In Minnesota an agronomist said he was "alarmed" at the situation. At Nebraska agricultural agents reported 50 per cent damage to wheat. In Iowa agricultural experts admitted loss of first May crops.

MONTREAL—"Rapid, constant and impressive" in the description given in the current monthly letter of the Royal Bank of Canada to the expansion of business activity in Canada since March 1933, low point of the depression.

In the past three months, the letter says, carloadings were almost 25 per cent larger than in the same period of 1933, steel production tripled, automobile production rose from 13,258 units to 25,455 and new car sales 41 per cent.

The power industry has expanded operations to meet the increased demand and the volume of electrical energy generated has established new records appreciably above the peaks attained in 1933.

Gold mining is more prosperous than ever before and the output of base metals bids fair to establish new records.

In both the Maritime provinces and British Columbia, the demand for lumber has been ordered in many years.

OTTAWA—The government brought relief to non-dividend paying gold mines, placer miners and producers of low grade ore, by announcing that the proposed tax on gold would not apply to them. The question of constitutionality of the law, if any existed, was dealt with by changing the procedure to place a 25 per cent tax on the premium paid instead of 10 per cent tax on production.

As a further guarantee against anything in the nature of double taxation the gold mine companies will be permitted to credit their corporation income tax against the gold tax.

The tax, which will run from April 1 of this year, to May 31, 1935, will not apply to any company not paying dividends nor to any company which did not pay dividends prior to January 1, 1933.

In no case will the tax operate when the premium is such that the price to the producer is less than \$30 an ounce.

THIRTEEN MILLION HITS, TENNIS

The Canadian Lawn Tennis and Badminton magazine has the following to say:

"Some tennis players are a real tonic for the sporting gods business. Take R. Nishik for instance. A German professional, who has a leaning towards statistics, and whose figures on the game are a real revelation.

Here Nishik estimates that he has won seven hundred rackets during his career, but that is only trivial as compared to some of the other figures that he has produced. Eighty thousand balls have been used by him, which is a pretty big business in any land. The German pro has employed a pedometer as an aid to the compilation of data as to what goes on when one plays tennis. In a recent match he estimated that during an hour of play he took thirteen thousand steps and had hit the ball five hundred times.

As he plays about two hundred and fifty times a year he calculates he hits the ball five hundred thousand times during that period, or thirteen and a half million times during his career.

WHAT ABOUT SOCIAL CREDIT, CANADA?

This series is an explanation of the Douglas Social Credit Plan. Mr. Williams (W) a Social Credit advocate, is explaining the plan to his friend, Mr. Jones (J). The scene is Mr. Williams' home, and the conversation takes place during an evening visit.

W. "I suppose you are anxious to ask questions about the operation of the Just Price but if you don't mind I would like to talk over some of the uses of a discount like this.

Our power for producing goods greatly exceeds our power of consuming them. We do not consume all we produce for we make roads, bridges, factories, machines, etc. These are not consumed by individuals. Individual consumption but are used for producing future consumable goods. All these can be considered as the liability Credit of a country and it is on this basis that financial credit is issued.

J. "That's a long way from the gold standard basis of financial credit."

W. "The gold standard basis is a long way from common sense. We have left a kind of Make-believe and have come into a land of reality where we consider things as they are and not for the sake of a few gold coins. We have left the old if they observed certain theoretical rules."

Well, our task is to make financial credit a true reflection of real credit. If our net production increases, our money should increase, and vice versa. As long as on this principle we can adopt the practice of equating production and consumption by assisting the consumer to purchase goods which under present conditions he cannot buy as he has lost the purchasing power by the various ways we have discussed this evening."

J. "How do you tell the real cost of anything?"

W. "The real cost of production is consumption. That sounds like a nice crack when you first hear it but as you start to think about it you get the meaning. It simply means that the real cost of producing anything is the amount of things used or consumed in the process. For example, the real cost of a chair is the wood and other materials used in construction, the food consumed, the wear and tear of clothing and the energy used by the workmen—anything that went into the making of the chair."

"But some of these things will be

Second Crop Report of Department Agriculture

Establishing a record considerably in advance as to date over the average for the past ten years, seeding of spring wheat is largely completed at this date in those areas of Alberta lying east of the Calgary-Edmonton and Alderley lines of the C.P.R. and south of the main line of the Canadian National and is well under way in other parts of the province, while the seeding of coarse grains is now general. In a few early districts wheat is beginning to appear above ground.

The average amount of wheat seeded completed in Alberta by April 30 during the past ten years was 86.6 per cent while the amount completed by that date this year was somewhat greater than the average for the past

twenty-two years, which was 45.7 per cent.

Reports received by the provincial Department of Agriculture indicate that the percentage of reduction in the wheat acreage will be small, though an accurate estimate will not be possible until the June compilation of acreages.

Aside from the early date of seeding, conditions of the entire province may be considered normal. The moisture conditions in most areas are still satisfactory for good germination, but in some southern and south-eastern districts more rain will be needed shortly to carry on. During the last two days of April and the first of May, rains fell in most districts over the province, varying from light showers to heavy rains in a few areas where local operations were a little delayed.

Grasshopper eggs are plentiful throughout the prairie areas but hatching has not occurred to any great extent as yet. The indications are that unless a heavy rain occurs, the grasshopper menace will be fully as serious as last year. Hopper control organization is now complete throughout the areas affected and ready for operations at the earliest moment necessary.

TENNIS NOTES

CARBON "B" TENNIS TEAM DEFEATS HESKETH

An interesting tennis match was played at Carbon on May 8th between the Hesketh Tennis Club and the "B" team of the Carbon Lawn Tennis Club. The result was a win for Carbon by four events to three. The following are the results and scores.

Men's Singles—N. Nash, Carbon, defeated H. Hesketh, 6-4, 6-2.

Men's Doubles—H. Macdonald, C. Poxon, Carbon, defeated J. Pittsford, Hesketh, 6-1, 6-2.

Men's Doubles—H. Macdonald, C. Poxon, Carbon, defeated L. Brown and L. Stunnen, Hesketh, 6-3, 6-2.

Men's Doubles—J. Stunnen, Hesketh, defeated H. Brown and S. Campbell, Carbon, 6-3, 1-6, 7-5.

Ladies' Singles—Miss J. Heath, Hesketh, defeated Miss R. Reed, Carbon, 6-4, 6-2, 6-3.

Ladies' Doubles—Miss J. Heath & P. Olmsted, Carbon, defeated Miss R. Reed and E. Halstead, Carbon, 6-1, 6-2.

Miss Doubles—Miss D. Nash and Norman Nash, Carbon, defeated J. McEwan and Mrs. L. Brown, Hesketh, 6-1, 6-2.

Carbon Juniors Defeat Trochu

The Carbon Lawn Tennis Club Juniors visited Trochu on May 5th and defeated the Trochu Juniors in a lawn tennis match by five events to one. C. Ritz of Trochu was the only event for his side in a three set match with H. Wise, P. Poxon, Carbon, and B. Keir, Trochu, staged a big battle in their singles event. Keir leading by 5-0 in the second set, but Poxon fought back to take the set 6-5, 6-2, having previously taken the first set 7-5.

The following are the results and the scores.

Boys' Singles—R. Wise, Carbon, defeated John Ritz, Trochu, 6-0, 6-0.

Boys' Doubles—H. Macdonald, Carbon, 2-6, 6-4, 6-0. P. Poxon, Carbon, defeated B. Keir, Trochu, 7-5, 6-0.

Boys' Doubles—H. Wise and S. Malton, Carbon, defeated L. Ritz and J. Ritz, Trochu, 6-3, 6-3.

Boys' Doubles—H. Wise and S. Malton, Carbon, defeated L. Ritz and J. Ritz, Trochu, 6-3, 6-3.

GRAND FORKS ATHLETIC ASSN NAMES TEAM MANAGERS

At a directors' meeting of the G.F.A.A. held last Wednesday, the following team managers were appointed: Baseball, Dick Graydon; Junior baseball, Sam Perkins; Softball, Art Hudson; Boxer, Scotty Hill; Lacrosse, Bill Marshall; Football, B. Barnes; Basketball, Mr. Meril Anderson. Girls' Softball, Jack Anderson; Junior girls' softball, Tom White; Horseback, Len Marshall.

Sports Day to be Held on July 4th

At a meeting of the Association on Monday night it was unanimously decided to hold a big sports day on the

FIRST BANK OF MONTREAL CROP REPORT

General—Wide variation as regards seasonal conditions and the progress of agricultural operations exist in the several parts of the Dominion. In British Columbia vegetation and well advanced seeding reflect a spring three weeks earlier than usual. In the prairie seeding is fairly general. In Ontario farming operations are three weeks later than average and germination is backward. In Quebec Province ploughing has commenced but it will be two weeks before seeding becomes general. In the Maritime Provinces spring operations generally are well begun. The Province of New Brunswick a fair start as regards moisture, this having been above normal in the three Provinces, although soil moisture is still lacking over the south-east of south and west central Saskatchewan and in southwestern Manitoba. Present indications on the prairie point to reduced wheat acreage and an increase in fodder crops.

Northeastern Alberta—Spring work started in mid April and seeding is about 25 per cent completed.

Southeastern Alberta—Seeding is about 20 per cent completed. Moisture conditions are fair and soil moisture is being checked by rain.

Western Alberta—Seeding is general and sugar beet seeding is getting completion.

Manitoba—Seeding is general and sugar beet seeding is getting completion.

Saskatchewan—Seeding is general and sugar beet seeding is getting completion.

Fourth of July, and tickets, entitling the purchaser to admission and a chance for a drawing on \$15 worth of

Gas Struck at Brooks

Drilling for oil at the Frontier Development Co. has struck a flow of gas in their well near Brooks on the Saskatchewan River northwest of Vermilion, in what is believed to be a continuation of the Viking gas field. No estimate of the volume of the flow is possible in this well as yet.

Good Prices For Wool

Wool growers in Southern Alberta, marketing through the Canadian Co-operative at Toronto, have received further payment for wool shorn last year, and will receive about 15 cents per pound, which is about three times the average received for the previous year's clip.

merchandise at Henry Binks, Calgary, will be sold. Watch for posters announcing the big event.

The members elected on Wednesday afternoon for service at the C.P.A.A. grounds and the members of all the teams are open for engagements with teams throughout the district.

Basball was popular at the dam and near Drumheller on Sunday when Carbon high school beat to Grammar 14-12. In the senior game Carbon beat Grinley 10-3.

Let Us Do Your Printing?

All business houses need more or less printed matter, all of which is within the possibilities of the local printer. Yet how many are to pass up the opportunity and let the matter go to city offices which have no interest whatever in rural communities except to get printing orders and the cash to pay for them. Business men, remember that the home printer is constantly promoting the interests of the home community and you owe it to yourself and your local paper to back up these efforts by at least having your related matter done locally.

Thousand Miles An Hour

Astonishing Things Predicted By Sir Charles Kingsford-Smith

While through the stratosphere at well over a thousand miles an hour in the hermetically-sealed cabin of a giant air liner, guided either by wireless control stations on earth—or you can imagine the possibility, Sir Charles Kingsford-Smith, hero of the recent record-smashing flight to Australia, believes this not only possible, but likely. In an astonishing vision of the future, he foresees that within the next fifty years he foresees air travel brought to such a pitch that ships and railways will become semi-obsolete, their sole use being as carriers of heavy freight.

"There will be no human pilot, but gyroscopic control," said Sir Charles. "The huge flying liners which will move through the stratosphere at a uniform speed of 1,200 miles an hour, carrying 100 passengers in their luxurious cabins, will be fitted with super-efficiency, super-charged engines and variable pitch propellers.

"Risk will be negligible. Each plane will have ten, twelve or fifteen engines, all in the event of one cutting off, the officer in charge will simply deduct that engine from the propeller while the mechanics repair their sole use will be as carriers of heavy freight."

Actually, to accomplish the amazing feat of which Sir Charles speaks we do not require more powerful engines than are already built. The atmospheric density 60,000 feet above the earth is about a quarter of what it is here, so that an engine, which under normal conditions produces 1,000 horsepower, will produce 3,000 horsepower at 60,000 feet.

Nothing has been said so far as to the price problem. It is stated, but is not settled, that the price of the plane will be about \$1,000,000.

Details of the plan which have emanated, so far, from the conference at Rome, are not complete enough to warrant analysis with a view to computing their details. Apparently, however, it is proposed to employ a pricing system to regulate exports rather than the common process of regulating exports to control price fluctuations. Apparently, too, the intention is to base the minimum price of wheat on the relation between export supplies and the month to month demand, with the London quotas rigorously adhered to by the exporting countries.

Nothing has been said so far as to the price problem. It is stated, but is not settled, that the price of the plane will be about \$1,000,000.

Western Canada awaits with interest and expectation complete details of the proposals drafted by the experts for submission to the signatory nations. Price of course, is a matter of paramount importance to the farmers of the prairie provinces, and if, by agreement, the world price can be raised and stabilized, a long step will have been taken towards stabilizing the agricultural industry in Western Canada. It is impossible here to talk of lowering production costs while dist and other charges remain as high and uncontrollable overhead factor in them.

Of scarcely less significance to the prairie farmer is the matter of lower customs duties against Canadian wheat in the importing countries of Europe. If, then, in addition to raising world prices, there is an adjustment downward of tariffs associated with wholesale efforts by the importing countries to increase consumption of wheat and at the same time to reduce domestic production, Western agriculture may assume a new hope of fulfillment and success, the task of orienting itself to the new economic objective. That is to say, if the spirit of the London agreement is observed to the letter of its various terms, there is no obvious reason why, once the carryovers are disposed of, Canada's export quota should not progressively increase pari passu with her ability to consume the products of industries indigenous to her best customers. Signs already are conspicuous of the ultimate determination of positive or negative reaction to the terms of the London agreement by the importing countries to be the "balance of trade".

Throughout the world, a series of exceedingly interesting and vital important economic experiments are underway, with the various nations engaged in concerted efforts to set their own productive processes in order. The United States is seeking prosperity and stability through the agency of the Roosevelt "New Deal" Mussolini has his cooperative state with industry, organized on a national basis, acting as "economic advisor" of the government. Germany is essaying recovery through a process of state intervention, and Austria apparently is preparing to adopt the Italian model. Russia, of course, is seeking to gear the productive machine to the needs of her people, through socialization. In Britain, the means to recovery is styled "nationalization." All the experiments have one element in common—government intervention, government control and government regulation. The same trend is patent in Canada, for recent legislation has laid foundations for a wide range of machinery for control and regulation, which is to be erected and made operative as conditions determine.

Value Of Birds
Rev. H. H. Pratt, Mass., in placing the value of various species of birds, said the meadow larks are worth \$2 each. The robin, he said, "is worth its weight in gold." In setting the value of the robin, Rev. Henry declared it does great work in eliminating grain and lawn pests, while the meadow lark also helps the farmer by assisting in ridding his fields of the smaller pests.

World's Cheapest Air Rate
The world's cheapest air service has been inaugurated between Rome, Belfast, and London. The service will cost passengers not more than a penny a mile. Equipped with two motors of 460 horsepower each, the planes will carry 15 passengers and two pilots. The Southern Railway has been awarded a contract to operate an air line between Croydon and the Isle of Wight.

Smothering Sensations
Faint and Dizzy Spells
Those feelings of faintness, those dizzy spells, those aching smothering, sinking sensations which come over people from time to time, are warnings that indicate an extremely weakened condition of the nerve and vital organs, and should be given immediate attention. These sensations in this way will find in M. J. H. and N. P. H. a remedy with which to regenerate their health, build up their run down system, and bring back their bodily vigor.

Ask your druggist for Milburn's H. & N. Pills.

First book printed in America was the "Escala Espiritual de San Juan Climaco"; no copies are known to be in existence.

Marvels of the Human Eye

By F. M. CROWE, Optometrist-Optician, Calgary

NO. 11—THE EYE IN ITS RELATION TO HEALTH

The eyes are large factors in any other health and efficiency. Since Nature allows to each organ its proper share of our total nerve energy, it follows that defective eyes use too much, other organs suffer a shortage, leaving them too weak to carry on their functions properly. Hence we often suffer ill in other organs, while the primary cause is to be found in the eyes.

The eye is the most wonderful of the five special senses, extremely sensitive and delicate and very easily thrown out of adjustment by overwork or abuse. A tired body or limb is given rest but the eye which has shared the general fatigue of the body is often required to go on working long after the work of the day is abandoned. Do not imagine that close work, the reading of the only time when the eyes work. Quite true, close work requires the use of extra nerve energy but the eyes are working and using nerve power every moment they are open.

The possibility of conserving human energy by correcting eye defects is greater than by any other means. These defects are usually due to the eyeball being imperfectly shaped and the muscles are involuntarily constantly trying to overcome these defects in the interests of better vision. The resulting strain can only be relieved by wearing correcting lenses.

It is not good for even normal eyes to concentrate too long on reading or sewing. Make it a habit to "look off" periodically for a few seconds and thus allow the muscles to relax and restore their nerve force. Avoid shadows and glossy paper as much as possible. Do not permit the light to shine into the eyes but rather on the book. Reading lying down is injurious. Hold the head erect with your work fourteen or sixteen inches from the eyes. It is harmful to continue at close work if the eyes smart, water, ache or burn, as these are signs of nature's warnings that there is trouble ahead. Have your eyes examined by an expert and know their condition.

(To Be Continued)

Historic Treasure Prized

Old Sword Once Flashed At Battle Of Waterloo

An historic scabbard that once flashed in battle under the colors of King Louis XVI, of France, is highly treasured today by Auguste de Tremontaine, who was established at Tremontaine, Sask., 1883.

It is the scabbard of Baron de Villeneuve, Tremontaine's grand-uncle, who was breveted lieutenant by Louis XVIII, 1785. The scabbard was in all the campaigns of Louis XVI, including those of Napoleon on the march to and from Moscow, the battle of Waterloo, and the defeat of Bonaparte. He died in 1836 and the scabbard passed to Tremontaine.

The great-oldest pioneer of this little village migrated from France in 1873 and established his home at Tremontaine, Chautauque county, Quebec. He moved west 20 years later.

Light Refreshments

Police Of New York Evidently Have Hearty Appetites

New York's "Finest" may not be either wealthy or wise but they are certainly healthy, judging from the recent export of 6,000 policemen.

On a special occasion these "Coppers" had breakfast together recently and here is what they are reported to have eaten: 3,000 grapefruit, 1,200 pounds of butter, 24,000 eggs (scrambled), 2,500 roast chickens, 4,000 pounds of potatoes, 12,000 sausages, and 12,000 loaves of bread.

This light snack was washed down with 800 gallons of coffee, 800 quarts of milk and 1,200 quarts of cream. If the reader chooses, he can figure out the exact share of the average policeman for himself.

School Age At Eight

Children should not be permitted to go to school until they reached the age of eight, in the opinion of Dr. Laurence P. Folsom, president of the New England Council of Optometrists. "The eyes of the human being," he says, "do not reach the state of maturity until the child is eight years of age, and much of the unnecessary strain to which we subject the eyes of children in the classroom should be avoided to insure healthy eyes among the future generations."

About two-thirds of the road mileage in the United States is rated as "unimproved."

The Chaplain sea is the world's largest inland sea.

Author of "Joretta," "Lipstick Girl," "Etc."

SYNOPSIS

Camilla Hoyt and Peter Anson, young and in love, marry secretly, deciding to live their own lives apart. Peter is able to provide for his wife. She is a young, strapping sculptor, trying to win a competition for a scholarship abroad and Camilla is the adopted daughter of a wealthy family. She is not to inherit money when she comes of age and is studying commercial art in the hope of leading an agency job. Others in the story are Avie Worth, another wealthy girl who is trying to win Peter, Sylvia Todd, Peter's model, and Ed Watson, his former roommate with whom he has quarrelled. At a party at an exclusive club Peter entertains Camilla's guests with impersonations. When the rest of the members of the party go to bed, Peter and Camilla slip off to the beach by themselves and fall asleep on the sand. When they awake it is early morning and the other party boys are standing near her. This makes it necessary for Camilla to announce before the party that she and

"Blue" Spells

Reduce some women to the piteous shadow of their former smiling selves. Others take the Vegetable Compound when they feel the "blues" coming on. In some cases, it helps to tone up the general health—give them more pep . . . more energy.

LYDIA E. PINKHAM'S VEGETABLE COMPOUND

BETTER COOKING and LESS WORK—also ECONOMY

Cook fish, meat and vegetables in Chapsup. You will be delighted with their new flavor—and no odors escape. At dealers or write—

as easily as they get into it. But don't mention money to him again. Let him sell apples for a living. If he wants to be so stubborn and independent," She laughed. "In any way, I admire him. I'm sorry for him too. Peter's a grand guy, but he needs a lift somewhere. If he don't take from you, maybe he will from someone else."

"Who?" Camilla inquired anxiously.

"Oh, someone will recognize his talent, perhaps, and get around his pride complex. I hope so, for his own sake, and yours."

The shrilling of the doorbell startled both of them. They looked at each other inquiringly, for they seldom had visitors.

"It's probably Peter," Rose observed. "If it is, I'll get out, so you two can talk."

"Please don't I don't think it could be Peter, though," Already, her heart was racing at the thought.

"Well, you won't know until you open the door," she smiled to herself at Camilla, who sat as if glued to her chair and yet looking as if she wanted to fly to the door.

A second until I get this sewing out of sight."

Camilla patted her hair and powder, her nose hurriedly being called into the speaking tube, "Hello."

"Camilla!" inquired a voice that caused an exquisite delight to vibrate through her whole being. "It's Peter."

As if she didn't know! Already, she had pressed the electric button to release the downstairs lock, and was outside in the hall waiting when he reached the top of the stairs. His long legs always seemed less than two or three steps at a time.

He took both her outstretched hands and kissed her eagerly, drawing her into the room. "Darling!"

"Peter, I'm so glad to see you!" she whispered.

He tossed his hat onto a table and looked around. "Hello, Rose. Am I intruding?"

"Not at all. I'm tickled to death you came. I wanted to go out home and see Ma tonight, but Camilla doesn't feel like going and I didn't want to leave her alone. Now I can't go alone."

"Why, you never said," Camilla began.

"Of course not. I knew you would insist on staying alone. I'd rather not come back tonight, either. Can't you stay, Peter?"

"Why—if Camilla wants me." "Well you know what the answer will be," she said vaguely. "I'll be back, anyway. I'll take my slip out and sew the lace on the machine. That will be much better and save me a lot of time."

He stood before the mirror and adjusted a red beret over her soft blonde hair, buttoned the collar of a tweed coat under her chin. "You're not, is it?" she asked Peter.

"Rather," he replied. "Isn't that mind going out alone?"

"I should say not! It's early yet. Well, goodbye, you two. I'll just treat our guest right," she admonished Camilla with a sly wink.

"Nice kid," said Peter, who she had once called "Too bad she hadn't a chance like you."

"I don't know. In many ways, Rose is wiser than I. I envy her sometimes."

"Camilla, I came to apologize for the other day. I'm terribly sorry, he confessed.

"So am I, Peter. But that's all over. Let's forget it ever happened." She was in his arms, with her arm around his neck, close.

"My precious! I wish it hadn't happened. But what's past is past. I don't want to see you just as if it hadn't. Except please, dear, don't say any more about—that. Which is the way men apologize and repeat with no retractions or concessions. They may regret what has happened, but somehow the woman is still wrong in the opinion."

But like all women in love, it was enough for Camilla that he once more held her close instead of drawing away from her, that his eyes looked deep into hers with confidence.

"I was I was who had the black-blues that I, I haven't felt so low as long as I can remember. But everything is going to work out all right, somehow. His optimism was a happy surprise to Camilla. Hereafter, it had been as who encouraged him. This mood was not rebound from the depths of his recent despair. It was so delicious to relax in his arms and in the buoyancy of his mood.

3 MONTHS ON BISCUITS AND MILK

Woman's Digestive Troubles

Everyone who is subject to any form of indigestion should know of this woman's experience. Advice on how she has had such severe attacks is advice worth having. She writes:

"I suffered from indigestion, gastritis and constipation, and was so very ill. I had (on medical advice) to live on soda biscuits and milk for some time. And enjoy a good meal with me to take Kruschen, and now I can eat and enjoy a good meal without any painful after-effects. My health is restored—in fact, quite clear—and there is no sign of constipation. I will advise anyone suffering the same to take Kruschen." (Mrs. M. R. E.)

The immediate effect of the six salts in Kruschen is to promote a normal flow of the digestive and other vital juices of the body. Soon after you start on Kruschen you will find that you are able to enjoy your food with any pleasing after-effects.

As you persevere with the "little daily dose," you will see the relief which Kruschen brings is lasting relief.

times when I think about some of the old boys of the past who had to die before the world would recognize them, may not be a genius in the class, but look at the fellows like Farquhar. He died penniless and writing a play that has survived for two centuries."

"Let me about him. I don't know the story," Camilla prompted.

Anna told the story of his life. He was like him. But he wrote his masterpiece on his deathbed, when he knew he was doomed to die, and in extreme poverty. The play was a tremendous success from the first, but he lived for only a month after the premiere.

"Peter, I'm so glad to see you!" she whispered.

He tossed his hat onto a table and looked around. "Hello, Rose. Am I intruding?"

"Not at all. I'm tickled to death you came. I wanted to go out home and see Ma tonight, but Camilla doesn't feel like going and I didn't want to leave her alone. Now I can't go alone."

"Why, you never said," Camilla began.

"Of course not. I knew you would insist on staying alone. I'd rather not come back tonight, either. Can't you stay, Peter?"

"Why—if Camilla wants me." "Well you know what the answer will be," she said vaguely. "I'll be back, anyway. I'll take my slip out and sew the lace on the machine. That will be much better and save me a lot of time."

He stood before the mirror and adjusted a red beret over her soft blonde hair, buttoned the collar of a tweed coat under her chin. "You're not, is it?" she asked Peter.

"Rather," he replied. "Isn't that mind going out alone?"

"I should say not! It's early yet. Well, goodbye, you two. I'll just treat our guest right," she admonished Camilla with a sly wink.

"Nice kid," said Peter, who she had once called "Too bad she hadn't a chance like you."

"I don't know. In many ways, Rose is wiser than I. I envy her sometimes."

"Camilla, I came to apologize for the other day. I'm terribly sorry, he confessed.

"So am I, Peter. But that's all over. Let's forget it ever happened." She was in his arms, with her arm around his neck, close.

"My precious! I wish it hadn't happened. But what's past is past. I don't want to see you just as if it hadn't. Except please, dear, don't say any more about—that. Which is the way men apologize and repeat with no retractions or concessions. They may regret what has happened, but somehow the woman is still wrong in the opinion."

But like all women in love, it was enough for Camilla that he once more held her close instead of drawing away from her, that his eyes looked deep into hers with confidence.

"I was I was who had the black-blues that I, I haven't felt so low as long as I can remember. But everything is going to work out all right, somehow. His optimism was a happy surprise to Camilla. Hereafter, it had been as who encouraged him. This mood was not rebound from the depths of his recent despair. It was so delicious to relax in his arms and in the buoyancy of his mood.

"You just forgot that the kind of thing you are doing can't be accomplished in a day. The kind of things in life always take time to accomplish."

"I don't mind waiting for a reasonable time, but I get panicky some-

Little Helps For This Week

"I was afraid and went and hid my talent in the earth, lo there thou hast that is thine." Matthew 25:25.

Time was I shrank from what was right. From fear of what was wrong: I would not brave the sacred right. Because the foe was strong.

But now I eat that finer sense And never shun as before. Such dread of sin was indolence, Such aim at heaven was pride.

—J. H. Newman.

If the really devout man falls into some error he does not fret over it, but rising up with a humble spirit he goes on with his way rejoicing. Were he to fall a hundred times in the day he would not despair, he would rather cry out lovingly to God appealing for His tender mercy and pity. The really devout man has a horror of evil, but he has still greater love for that which is good, he is more set on doing right than avoiding wrong. Generous, large-hearted, he is not afraid of danger in serving God, and would rather run the risk of doing His Will imperfectly than not strive to serve Him lest he fail in the attempt.—John Nicolaus

Forget His Haughtiness

New York Hotel Doorman Took Tip From Scrubwoman

Anna Golen, scrubwoman, made her grand gesture the other day. Anna was one of 25 New Yorkers who gathered at the Hotel Roosevelt to receive prize awards in the Panama International Sweepstakes. She was, in advance, that she has no truck with cheques, and that she would prefer to take her \$3,078 in cash.

Accordingly, Anna was handed a tremendous roll of bills and grand ceremony. As she came through the revolving door to the street, she encountered a barrel-chested gold-braided doorman who gave her a laughingly glaze as though to say: "Way don't you use the servants' entrance?"

Anna looked him over coldly. She pulled out a roll of bills. She gest off a five.

"Here, young man," she said, "Go, get yourself a haircut."

Mr. and Mrs. A.P. McKinnon motor-
ed to Calgary on Tuesday.

Fire on Saturday night destroyed a
bunk house, grainary and about 400
bushels of wheat at the Clyde Ander-
son farm. Cause of the fire is unknown.

Mr. and Mrs. R.J. Fairbairn of Cal-
gary were visiting in Carbon for a
couple of days last week.

Mrs. W. Poxon, Lawrence and Alex
arrived in Stettler on Friday last.
While there they made all arrange-
ments for the commencing of a bus
service between Calgary and Stettler,
and the run will start at 7:30 a.m.
from the northern town today, Thurs-
day. The Red Bus Lines also control
the run from Stettler and expect to
extend their service in that direction
shortly.

Harold Edwards spent the week end
with his parents in Carbon.
Mrs. L.O. McDougal was a Calgary
visitor on Monday.

Wheat sowing in the district is be-
ginning and many fields are now show-
ing green, new grain in some instances
being over four inches high.

Mr. and Mrs. Len Poxon motored to
Calgary on Tuesday.

Miss Irene Nash spent Monday in
the City.

A little renovation has been going
on in the Builders' Hardware Store
 lately, now shelving having been built
in the south-west corner of the build-
ing.

Mr. and Mrs. Edwards motored to
Calgary on Monday.

Mrs. Jasper Rochester was a visi-
tor to Calgary on Monday.

A Fuller took a load of hogs to Cal-
gary on Tuesday, returning the same
evening.

Mr. and Mrs. J. Smith spent Mon-
day in Calgary.

Mrs. C. H. Nash returned from Cal-
gary on Monday.

The Right Rev. the Lord Bishop of
Calgary will hold services on Sunday
May 13th, as follows:
St. James' School, Drumheller, Divine
Worship, 9:30 a.m.
Christ Church, Carbon — Confirma-
tion, 7:30 p.m. Everybody welcome.

We presume it was a member of
the Communist party who left de-
calques at the doors of the business
houses about town early Monday Morn-
ing. A few stickers were also in evi-
dence. The decalques were headed as
"Fights for the Recall of Section 94"
and contained a paragraph "Help to
Free Tim Buck, Tom Egan, etc."

A thunder shower passed over the
district on Tuesday night and the
misture was welcome.

By mutual agreement the agents of
the Carbon elevators have decided to
close the Wednesday half holiday
throughout the summer months and
commencing on Wednesday, May 17,
they will close at one o'clock. Farm-
ers wishing to haul grain are asked
to know this in mind and arrange ac-
cordingly.

CHRIST CHURCH, CARBON

Services will be held as follows:

1st Sunday in month—Morning Prayer and Holy Communion

1st Sunday—Morning Prayer

1st and 4th Sundays—Evening service

1st Sunday—by arrangement

SUNDAY SCHOOL, Every Sunday morning at 10 o'clock

Assurance of SAFETY

The first requirement of the investor, particularly the small investor, is assured safety; income yield is of lesser importance. That is why so many hundreds of thousands of Canadians regard their savings deposits in this bank as the best type of investment. The income may not be so attractive as the promised yield of certain securities, but it is sure and steady, while the principal itself is safe and always remains at full face value.

REBUILD HEALTH STRENGTH THIS EASY WAY

When you are fagged out and run
down it often means that you need
more iron! Get Pepton, the scientific
iron and malt compound. It enriches
the blood—rebuilds nerve tissue—en-
ergetic the appetite and aids digestion.
Many praise Pepton for new health
and energy. It is sold only at McEl-
lison's Drug Store, Carbon.

A driver of the Alberta Transport,
operating between Drumheller and
Calgary, appeared before Justice of the
peace, V.R. Hawkins, on Monday at
10 a.m. on a charge of carrying 120
passengers contrary to the Vehicles Act,
and was fined \$10 and costs. Constable
J. Stevens prosecuted.

Drivers of trucks and other vehicles
are reminded that they cannot carry
passengers over a route where a fran-
chise is held by other parties and the
R.C.M.P. officers are checking closely
any infractions of the law.
